

RUPPNER PFERDEFUTTER

Spezialfutter Neuruppin GmbH & Co. KG

RUPPNER MAUKAL

To support the regeneration of the skin and skin appendages

Support during and after a
mallenders

Strengthening the immune system

Can strengthen skin and
metabolic function

Ruppiner Maukal contains highly effective trace element compounds and, as a feed supplement, can support the regeneration of the skin and hooves. The horse's skin in particular is an important component for its well-being. Especially in the wet season, it offers the horse important protection against moisture and dirt. This protection can become unbalanced and vulnerable. Ruppiner Maukal can support the immune system and the metabolism through its trace element complex and thus promote the regeneration of the skin. Furthermore, grape seed flour contains a high proportion of OPC (procyanidin), for which a very strong antioxidant effect has been proven. The antioxidants also promote the activation and detoxification of the metabolism and wound healing.

Feeding recommendation: This supplementary feed may only be fed with up to 8 g / 100 kg body weight / day due to the higher content of trace elements compared to complete feeds. For a large horse (600 kg) we recommend an administration of 50 g / animal / day. The feeding recommendation should be strictly adhered to without interruption of administration for 8 weeks. Ruppiner Maukal should not be fed to young animals under the age of 6 months. One measuring spoon corresponds to approx. 20 g.

Composition: Sucrose, wheat semolina bran, grape seed flour and grape marc, dried

Analytical constituents and contents: 5.8% crude protein, 2.3% crude fat, 6.2% crude fibre, 12.54% crude ash, 0.42% calcium, 0.22% phosphorus, 0.0% sodium, 0.14% magnesium

Additives per kg Copper (organically bound): 3,500 mg, Zinc (organically bound): 21,000 mg, Manganese (organically bound): 7,000 mg, iodine: 700 mg

Packing: 2,5 kg bucket
